**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lewis US 3,873,494 taken with Ongchin US 4,246,142.
3. Lewis teaches the use of peroxides to cure compositions based upon carboxylic modified polyethylene and carboxylated acrylonitrile butadiene, see column 1 lines 48+, column 2 lines 15+ and column 3 lines 8+. The difference between this teaching and the claimed invention is the relative proportions of polymers. The Ongchin patent also shows the use of peroxides to cure compositions based upon carboxylic modified polyethylene and acrylonitrile butadiene, see column 1 lines 65+. This patent further shows the relative amount as being not critical and falling both within the scope of the claim and the disclosure of Lewis. One of ordinary skill would appreciate that the relative amounts are not critical and be motivated to utilize amounts falling within those claimed given the art recognized resultant properties. It would also be obvious to incorporate the carboxylated acrylonitrile butadiene of Lewis where the acrylonitrile butadiene is called for in Ongchin.
